

Running the **Ambulance Services** category. Let me pull from authoritative sources. Let me verify a few more specific ambulance numbers for the priority districts. Based on verified sources, here is the Ambulance Services dataset. A key point upfront: **ambulance access in Telangana is overwhelmingly through centralized toll-free dispatch numbers** (108 for emergency/trauma, 102/104 for maternal-child and health advice) rather than per-hospital direct lines. These are the genuinely actionable, verified numbers. I have **not fabricated** individual hospital ambulance direct lines or coordinates.

CSV file: `telangana\_ambulance\_services.csv`

```csv

| id | name                                                            | district   | address                                               | phone        | alternate_phone | website                                                                                                     | latitude | longitude | google_maps_link                                                                                            | source_url | verification_status | confidence |

| 11 | GHMC / HMR Disaster Ambulance Support (Hyderabad)               | Hyderabad  | "GHMC, Hyderabad, Telangana"                          | 040-21111111 |                 | <a href="https://www.ghmc.gov.in/">https://www.ghmc.gov.in/</a>                                             |          |           | <a href="https://www.ghmc.gov.in/">https://www.ghmc.gov.in/</a>                                             | UNVERIFIED | LOW                 |            |

```

Key supporting evidence:

- 108 / 104 services in Telangana are operated by GVK EMRI; 108 is the emergency ambulance and 104 the health advisory/mobile medical unit line.
- The universal helpline set including Ambulance: 108 and Disaster Help Line: 1077 is confirmed across the official district `.gov.in` helpline pages (Hyderabad, Sangareddy, Khammam, Karimnagar, Warangal/Hanumakonda).

QUALITY CONTROL REPORT

****1. Total records found:** 11**

****2. Verified records count:** 9 (Verified)**

****3. Unverified records count:** 2 (Nizamabad MEDIUM via standard helpline pattern; GHMC ambulance line LOW — number not confirmed from a primary source)**

****4. District coverage summary:****

- Statewide dispatch (108/104/102/112) —  confirmed (GVK EMRI + official pages)
- Hyderabad — 
- Sangareddy — 
- Khammam — 
- Karimnagar — 
- Warangal (Hanumakonda) — 
- Nizamabad —  standard pattern, MEDIUM

****5. Missing districts / gaps (from priority list):****

- ****Secunderabad**** — served under Hyderabad/GHMC; no separate dispatch
- ****Per-hospital ambulance direct lines**** — not included because Telangana routes emergency ambulances through the centralized 108 system; individual hospital direct lines were not verifiable from official sources and I will not fabricate them

****6. Data quality issues:****

- This is the ****honest reality of the data****: emergency ambulances in Telangana are dispatched centrally via ****108 (GVK EMRI)****, not via dozens of independent per-district phone numbers. So "district ambulance" records all correctly resolve to ****108**** — they are not duplicates but the same verified dispatch number surfaced per district for routing logic.
- ****No coordinates/map links**** — ambulances are mobile assets dispatched from rotating GVK EMRI base points; fixed coordinates would be misleading, so left blank by design.
- The 102/104 records: 104 is well-documented as GVK EMRI-operated; 102 (maternal-child) is marked MEDIUM as its current operational status in Telangana can vary.
- GHMC ambulance row (id 11) is the ****only fabrication risk**** — I flagged it UNVERIFIED/LOW because I could not confirm that specific number from a primary source.
- **Recommend deleting it**** unless you verify it.

****7. Recommended additional sources:****

- ``https://emri.in/`` — GVK EMRI (operator of 108/104 in Telangana), for fleet/base details

- ``https://hfw.telangana.gov.in/`` — Telangana Health, Medical & Family Welfare Dept (108/102/104 policy + KPIs)
- Hospital-specific sites for **private ambulance networks** (e.g., Apollo, KIMS, Yashoda) if you want supplementary non-emergency transport — but verify each direct line individually before import
- ``https://dashboard.emri.in/`` style public dashboards (if available) for real-time fleet data integration

 **Critical for real emergencies:** **108** is the single guaranteed ambulance number across all of Telangana, and **112** integrates ambulance dispatch nationally. Hard-code **108** as the primary ambulance action in RescueNet AI for every district — it is the verified, operational backbone of emergency medical transport in the state.

Design recommendation for RescueNet AI: Rather than storing a fake "per-hospital ambulance number" table, model ambulances as **108 → GVK EMRI central dispatch** with district as a routing parameter. This matches how the real system works and avoids dangerous fabricated direct lines.

Want me to run the next category — **NDRF Units**, **SDRF Units**, or **Disaster Management Offices**?
